

33. (New) The assembly of claim 28, wherein the opening in the flange is adjacent a ramp that extends at an angle relative to an axis of the drum.

21
count
34. (New) The assembly of claim 33, wherein the ramp is positioned at an angle of approximately 45 degrees relative to the axis of the drum.

35. (New) The assembly of claim 33, including a sidewall on opposite sides of the ramp, each sidewall extending in a direction generally parallel to the axis of the drum.

IN THE SPECIFICATION

A marked up version of the below amended portion of the specification is included in attached Appendix A.

Please replace the paragraph on page 4 from lines 8-12 with the following:

22
Hood 6 is shaped in such a way as to have on its base contiguous with plate S, tunnel 13 which, with drum 4, defines peripheral passage 14 permitting manual introduction of engagement lead 15 of cable 3a (or 3b) onto about one turn around drum 4. To that end, the base of drum 4 is extended by flange 16 forming a unit with the drum, the width of which is roughly equal to that of tunnel 13.
